About Me

System administrator with 5+ years of experience managing enterprise-grade servers like HPE ProLiant, including hardware upgrades, RAID configuration, firmware updates, and VMware, Hyper-V, and Windows Server. Experience in assembling, upgrading, and replacing hardware components like RAM, hard drives/Nvme/SSDs, Motherboard, processors, power supply, PDUs and Laptop peripheral Setup.

Looking for a dynamic IT team where I can use my knowledge to enhance operational efficiency and security. Ready to use my system administrator skills to a forward-thinking organization where I can make a difference and progress professionally.
